EXAMINER'S AMENDMENT

n examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 3, line 3, change "styrene and" to "styrene;" ; in line 4, change "cyclic and" to "cyclic olefins;".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant's arguments for reconsideration filed 09-06-2006 have been found persuasive. Applicant points out that the encapsulated base (c) in the instantly claimed compositions is both encapsulated and covalently bonded or polymer-bound. It is agreed, upon reconsideration, that Spera et al do not teach covalently bonded bases or polymer-bound bases. Applicant argues that Spera et al do not teach covalent bonding between catalyst and encapsulant, such as wax or thermoplastic polymer. Spera et al do teach an encapsulated catalyst having ionic bonding between the nitrogen-containing base and a microgel having carboxylic acid groups. Thus the rejection over Spera et al in combination with Hoffman et al is withdrawn since the encapsulated active agents comprising a side chain crystallizable polymer disclosed by Hoffman et al are not considered to be analogous to the encapsulated catalysts taught by Spera et al. Applicant has further amended claim 1 to recite that the cationic photoinitiator is an iodonium salt or a sulfonium salt. Spera et al do not mention iodonium or sulfonium salts.
